

The Indiana Privacy Law has brought peace to our house by stopping the uninvited solicitations, which do not have a business relationship with us. We have experienced that most of the professional telephone market callers are aggressive and rude. This is not an experience that we want our children (ages 9 & 14) to have when they unknowingly answer the telephone. Please do not grant the Consumer Bankers Association the federal "established business relationship" exemption on us. Let us live in our homes in peace.
